Super Mirror (Image enlarged to show detail)

Product: Super Mirror	
Application:	Suitable for internal and external applications subject to correct grade specification.
Base Material:	2B Stainless steel
Grade Options:	304 (1.4301) or 316 (1.4401) as standard
Standard Gauges:	0.8mm, 1.0mm, 1.2mm, 1.5mm and 2.0mm
Standard Widths:	1220 mm as standard, up to a maximum of 1500mm. (Alternative widths available upon request.)
Standard Lengths:	2440mm and 3050mm as standard. (Alternative lengths available upon request.)
Standard Finish Options:	Super Mirror - (A highly polished stainless steel surface that gives a mirror finish without visible polishing marks.)
Non-standard Finish Options:	N/A
Directionality:	Super Mirror finish is a highly reflective, non-directional finish on stainless steel. (Note: The raw material is produced, via a directional process. This should be observed during installation as best practice where maximum uniformity is required. Coating provided will show directionality of production.)
Protective PVC coating:	Poillifilm PF562 C/80 or PF562 C/100 Laser Suitable coating as standard. (Alternatives available upon request.)
Material Composition:	As per mill test certificate.
Technical Data:	Gloss range: 470 gloss units RA reading (average): Ra0.06 (Note: Reading values given are approximate and may vary slightly from batch to batch.)
